New Trash Receptacle Look

Over the last month we have we have built covers for all of the Trash Cans. Every area in the park that had trash cans, now have a nice new look. We have enclosed the cans so that the trash will be able to be kept in the cans and not on the grounds. As some of you know, the neighborhood dogs have been getting into the trash and strewing it all over the park. We hope the new containers will eliminate this.

Also, please remember to put you trash in a bag before putting it in the can. Loose Trash is messy and attracts all kinds of pests.

Where Friends Become Family

Spring Camper Maintenance

With the spring approaching, it is time to air out the camper and get it ready for the camping season.

Remember to lubricate your waste system valves by keeping them closed until dump time. This will help prolong the life of the seals and help prevent black water tank problems.

Also, remember to clean you A/C filters so that they will be ready for the season. During the season, it is a good idea to clean them once a week to get optimum air flow.

Another tip, to keep ants and other crawling creatures from getting into your unit, lubricate the hoses and cords with Vaseline and they won't be able to climb up and into your unit.
